

**Custom Metal Parts &
Manufacturing**

Quick-Way

MANUFACTURING, INC.

Company Profile

Quick-Way Manufacturing was established in 1961. We are a manufacturer of custom metal parts. We are a job shop and our modern equipment is housed in a 60,000 sq. ft. facility. Quick-Way serves most high technology industries. We are constantly upgrading our equipment to meet the demands of modern industry. Employees are continually trained in the latest stamping technology.

Whether you need a first article or several hundred to several thousand parts Quick-Way is equipped to meet your needs. We use the latest state of the art wire EDM equipment and CNC machining equipment to create "Life-Time-Tooling". This tooling is produced in house specific to each customer requirement. With this kind of flexibility Quick-Way can offer fast turnaround and maximum cost effectiveness.

We produce only the highest quality parts. Our work force is dedicated and committed to quality. The latest inspection equipment assures parts are made exactly to your specifications order after order. We are an ISO 9001:2008 registered company.

Quality Policy

BE BETTER TOMORROW THAN WE ARE TODAY

We strive to exceed our customer's requirements and to continually improve our quality system.

Mission Statement

To be known for the quality in our fabrications, stampings, services, and our relationships with our customers.

To provide a work environment which empowers employees to pursue excellence.

To continue to be a leader in our industry by building on past successes and taking advantage of opportunities to assure future prosperity.

Please give us the opportunity to quote your next requirement.

You can e-mail us at sales@quick-way.com.

We accept DXF, DWG and most other electronic files.

Quick-Way

MANUFACTURING, INC.

Company Capabilities and Services

Custom Metal Manufacturing

- Material thickness range from .015" to .375"
- Material types include: Mild Steels, Stainless Steel, RoHS Galvanized, Aluminum Alloys, Copper and Brass
- Fiber Optic and Conventional Laser Cutting with an 8 Station Material Handling Tower
- 58 Station turret presses with automatic loader/unloaders, capable of punching to 35 tons
- Press Brakes up to 143 tons and with 10 foot bed lengths
- Stamping Presses up to 110 tons
- Virtek Laser Scanning Systems to insure repeatable flat blank accuracy

Secondary Operations

- Hardware installation
- Plating - all types
- Painting - Powder Coating
- Silkscreening
- Heat treating
- Stenciling
- Deburring - Vibratory & Belt Sanding

Assemblies

- Spot Welding and Riveting
- Pem nuts and custom hardware
- Welding and Grinding

Machining

- Haas Vertical Machining/Milling Centers
- Vertically Integrated tool room
- Tapping, Reaming, Drilling
- Counterboring, Countersinking
